

WHEN THE RESULT COUNTS

HARMONY STRUCOMIX ORIGINAL

UPDATED
FORMULA
LOWER STARCH
& SUGAR
HIGHER FIBER

THE HIGH-FIBER HERBAL MIXTURE NOW WITH LOWER NSC!

The equine digestive system is designed for daily grazing; as it is made up of a small stomach and a well-developed large intestine. Today's horses are usually fed highly concentrated feeds, relatively little hay and almost no herbs which is quite the opposite from what their digestive systems are designed to consume in nature. **Cavalor® Strucomix Original** is a complete feed containing all the natural raw materials a horse could have originally found in the wild while grazing. It can be used as a replacement for roughage, in addition to concentrate. It can also supplement concentrate and roughage so that your horse gets all the necessary herbs.

OAT FREE, CORN FREE, MOLASSES FREE

Strucomix Original has always been oat and corn free, but now it is also molasses free! Strucomix Original is a great choice for horses that are experiencing a wide variety of gastrointestinal or metabolic issues. This feed is perfect for horses with ulcers, insulin resistance, Cushings, and PSSM. It is now also higher in fiber with more long-stemmed alfalfa.

LOWER PROTEIN

Protein fed in excess of daily requirements cannot be stored in the horse's body. Horses convert protein into muscle mass by eating adequate protein and exercising. If protein synthesis occurs at the maximum rate, the unused amino acids are broken down and excreted. Protein, and therefore amino acid breakdown, happens in the liver and the waste products are excreted via the kidney. Constant overfeeding of protein may stress the organs responsible for taking care of breakdown.

HERBS FOR DIGESTION AND RESPIRATORY HEALTH

The herbs used in Strucomix Original stimulate proper digestion and improve appetite increasing the production of digestive enzymes that help break down feed into energy. The powerful antioxidant compounds in the herbs have been linked to reducing oxidative stress in the body, boosting the body's circulation and the oxygenation of essential organ systems.

LAYER TO MEET YOUR NEEDS

Each of our feeds have the same foundational elements. We use the same protein, fiber, barley and vitamin & mineral package. Because the foundation of each feed is consistent, you have the ability to layer feeds based on the energy level your horse requires to keep him performing at his best.

SUPPLEMENTS IN THE FEED

YEAST PLUS

YEAST PLUS adds active live yeast cultures to stimulate bacteria in the large intestine to consume lactic acid helping to reduce the formation of pathogenic bacteria). This process prevents acidification (a drop in pH levels) from occurring, allowing the microflora to flourish.

AIR FORCE

AIR FORCE is a unique blend of herbs that supports the respiration while opening up bronchial tubes and improving the oxygen supply. It improves the horse's condition naturally.

FIBER PLUS

FIBER PLUS contains crude fiber which is indispensable for the intestines and allows for the energy contained in nutrients to be gradually released. The crude fiber used originates from high-grade sources such as, alfalfa stems, flax fibers, etc. Crude fiber stimulates the production of vitamin B in the large intestine.

FLORASTIMUL

FLORASTIMUL is a probiotic supplement that can only be used by "good" bacteria to stimulate bacterial growth and development. It ensures the health of the intestinal flora, making the horse less susceptible to gastro intestinal upsets and disease.

OMEGA 3 PLUS

OMEGA 3 PLUS promotes a shiny and healthy coat, omega-3 fatty acids offer a wide number of healthful effects and support overall health, immunity and condition.

GUARANTEED ANALYSIS

Crude Protein	min 10.5%
Crude Fat	min 5.5%
Crude Fiber	max 22.5%
Moisture	max 14%
Acid Detergent Fiber	max 27%
Neutral Detergent Fiber	max 43%
Sugar	max 3%
Starch	max 10.5%

NUTRITIONAL ADDITIVES/KG

Calcium	min 0.8 - max 1.1%
Phosphorus	min 0.4%
Salt	min 0.3% - 0.7% max
Copper	min 35 ppm
Selenium	min 0.35 ppm
Zinc	min 100 ppm
Vitamin A	min 4000 IU/lb

INGREDIENTS

Soybean hulls / wheat middlings / dehydrated alfalfa meal / alfalfa stems / flaxseed meal / soybean oil / expanded barley, extruded / carrot pieces / rolled fava beans (dried processed) / puffed wheat / salt / yeast culture / fructooligosaccharides / garlic / oregano / thyme / sweet marjoram / mint leaves / calcium carbonate / vitamin A supplement / vitamin D3 supplement / vitamin E supplement / choline chloride / zinc sulfate / magnesium oxide / ferrous sulfate / copper sulfate / zinc amino acid chelate/ manganese amino acid chelate / copper amino acid chelate / calcium iodate / propyl gallate (used as preservative) / cobalt carbonate / sodium selenite / biotin

All Cavalor® feeds are produced in a Cavalor owned, medication-free facility.

DAILY FEEDING CHART WITH FORAGE

WORK	800LBS	1000LBS	1200LBS	1400LBS
MAINTENANCE	4.0 lb/day	5.0 lb/day	6.0 lb/day	7.0 lb/day
LIGHT WORK	4.7 lb/day	5.9 lb/day	7.1 lb/day	8.3 lb/day
MEDIUM WORK	5.5 lb/day	6.8 lb/day	8.2 lb/day	9.5 lb/day

*Important to note that these rations are when appropriate amount of water and hay is fed. *Forage is the basis of a good diet. The minimum requirement in dry matter forage is 1% of body weight of the horse. Horses can even eat up to 2.5% of their body weight in dry matter forage content.**
