

WHEN THE RESULT COUNTS

HARMONY TRADITION MIX

WELL BALANCED COMPLETE FEED FOR THE FOUNDATION OF YOUR FEEDING PROGRAM

Cavalor® Tradition Mix contains all of the necessary nutritional elements for a healthy horse feed. Cavalor® Tradition Mix is designed for horses at rest or performing light work. The excellent quality of Cavalor® Tradition Mix allows for a very broad use of the feed (regardless of the type of horse). This all-round mix can be digested very easily which leads to a better conversion from feed to usable energy. It's oat free mixture is great for digestion and even the pickiest eaters enjoy it.

HIGHEST QUALITY INGREDIENTS

Cavalor leads the industry in delivering high quality ingredients in a form that ensures high availability to the horse. The large flaked corn and flaked barley are a stable & safe energy source with ample viscosity to even the release from the stomach.

SAFE STARCH LEVELS

Research has proven the safe level of starch for a horse in maintenance is <1.5g/kg of bodyweight per meal (proven safe even up to 2g/kg), and for sport horses the safe starch level is <2.5g/kg of body weight per meal.* Our barley and corn flakes utilize a unique European flaking process to maximize digestibility while maintaining nutritional value.

LOW MOLASSES CONTENT

We handle our ingredients carefully during the manufacturing process to eliminate all possible dust and we limit the amount of pellets in the feed. This allows us to use molasses to increase the palatability of a feed, rather than using it to hide dust.

BALANCED BLEND OF VITAMINS AND MINERALS

Not only do we use a balanced blend of high quality vitamins and minerals, but we are always careful to use the most stable versions. While the vitamins we use are always in the most stable form, the minerals we use are always in the most absorbable form.

LAYER TO MEET HIS NEEDS

Each of our feeds have the same foundational elements. We use the same protein, fiber, barley and vitamin & mineral package. Because the foundation of each feed is consistent, you have the ability to layer feeds based on the energy level your horse requires to keep him performing at his best.

SUPPLEMENTS IN THE FEED

FLORASTIMUL is a probiotic supplement that can only be used by "good" bacteria to stimulate bacterial growth and development. It ensures the health of the intestinal flora, making the horse less susceptible to gastrointestinal upsets and disease.

GUARANTEED ANALYSIS

DE (Digestible Energy Horse)	11.35 MJ/kg
VRP (Digestible Crude Protein Horse)	9.3%
Crude Protein	min 13%
Crude Fat	min 3%
Crude Fiber	max 10%
Sugar	5%
Starch	29%

NUTRITIONAL ADDITIVES/KG

INGREDIENTS

Barley Flakes, Wheat Bran, Alfalfa, Corn Bran, Sunflower Seeds Extracted, Corn Flakes, Cane Molasses, Palm Kernel Expeller, Barley, Wheat Middlings, Calcium Carbonate, Soybean Hulls, Spelt Bran, Sodium Chloride, Soybean Oil, Palm Oil, Fructooligosaccharides, Vitamin D3 Supplement, Vitamin A Supplement, Vitamin E Supplement, Biotin, Choline Chloride, Copper Sulfate, Ferric Sulfate, Zinc Sulfate, Manganese Sulfate, Calcium Iodate, Sodium Selenite, Propyl Gallate (Antioxidant), BHA (Antioxidant)

All Cavalor® feeds are produced in an equine-only facility.

DAILY FEEDING CHART WITH FORAGE

WORK	800LBS	1000LBS	1200LBS	1400LBS
MINIMUM	3.3lb/day	4.1lb/day	4.9lb/day	5.7lb/day
MAXIMUM	4.7lb/day	5.9lb/day	7.1lb/day	8.3lb/day

Important to note that these rations are when appropriate amount of water and hay is fed. *Forage is the basis of a good diet. The minimum requirement in dry matter forage is 1% of body weight of the horse. Horses can even eat up to 2.5% of their body weight in dry matter forage content.*
